SUMMARY

Versatile Computer Programming student exercising both front-end and back-end development, demonstrating a strong inclination towards learning and adapting to new technologies. Seeking an innovative environment to develop tech skills and eager to contribute to a dynamic team.

EDUCATION

Diploma in Computer Programming

May, 2023-Present

Algonquin College of Applied Arts and Technology, Ottawa, Canada.

GPA: 3.72

Course Work: Object Oriented Programming (Java), Database Systems, Web Programming, Operating Systems (GNU/Linux), BI and Data Analytics, Network Programming, Mobile Graphical Interface Programming, Technical Communications.

ACADEMIC PROJECTS

Banking Management System

- Built a Bank Management System integrated with an ATM simulator, ensuring efficient data handling and user-centric functionalities for seamless banking operations.
- Employed a versatile framework to create this model, showcasing adaptability and proficiency in leveraging diverse tools to meet project requirements.

Spotify Database Management

- Led a collaborative team of 3 students in the design and development of a database application using Microsoft Access and Oracle 19c, focusing on creating a scalable and efficient system for data storage and management.
- Developed a comprehensive Microsoft Access application linked to an Oracle 19c database, leveraging SQL queries and linked tables to optimize data storage and retrieval, enabling seamless access to updated and historical information.

Personal Portfolio Website

- Developed and implemented a portfolio website showcasing a collection of projects and demonstrated skills in front-end web development.
- Deployed and managed the website efficiently using GitHub Pages, ensuring scalability.

PROFESSIONAL EXPERIENCE

Deli Clerk

August 2023-Present

METRO, Ottawa.
